Queries

- Query for add index

CREATE INDEX profile_fname_sname ON profile(fname, sname)

- Explain output

mysql> explain SELECT crid, fname, sname, age, gender, hob, city FROM profile WHERE fname LIKE 'Ave' and sname LIKE 'Che' ORDER BY crid;

•

•	+---+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+											
•	id	select_type	table	partitions	type	possible_keys	key	key_len	ref	rows	filtered	Extra
•	+---+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+											
•	1	SIMPLE	profile	NULL	range	profile_fname_sname	profile_fname_sname	1204	NULL	1	100.00	Using index condition; Using filesort
•	+---+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+											
•	1 row in set, 1 warning (0.03 sec)											

- Why index was chosen like that?

Because necessary search based on fname and sname. And fname has first place in select query.
